## Bacon and Hamburger Get Spotlight in AMI Ads

Bacon and hamburger will be featured in the August Meat Educational Program advertising of the American Meat Institute. "They'll Like it Better with Bacon" is the theme of a service ad on bacon which will appear in the August 7 *Life* magazine. An advertisement in the August 29 *Look* features a "Protein burger" for the peak of the summer sandwich eating season.

The American Meat Institute has scheduled advertisements extolling the virtues of lard as a superior cooking fat in journals in the medical and related fields. The first will appear in the August issues of *Gastroenterology* and the *Journal of the American Dietetic Association*. The ads also emphasize that lard is an excellent source of important nutrients and is one of the most digestible of all fats.

The wide range of subjects covered by THE NATIONAL PROVISIONER makes it an indispensable aid to packers.
